Re: Application for the position of Junior JavaScript Developer

To Siemens' HR Department,

Please accept this letter as an expression of my interest in your Junior JavaScript Developer position. After successfully passing a one year long intense JS/TS Front-end training specialized in Angular with the RS School (EPAM Systems), I believe to be the perfect candidate for such position, and that I would be a valuable addition to your team.

Regarding my working experiences, I am currently working as a Laravel (PHP) freelance developer. I completed this year a 3 month long internship within EPAM Systems as an Angular software engineer, where I discovered the Agile working methodology.

I also have a half a year experience as a Web Developer in a French communication agency. There, I could work in a small-scale development team mostly on Drupal projects, as well as Angular ones as a front. Thanks to these various experiences, I now understand the importance of team communication, share of responsibility, and most of all the necessity of writing clean and reusable code.

I am at the present time looking for a front-end position, though I am not limited to this area, and would be thrilled to explore other techs and skill up in some different frameworks/languages in the future. I would be really excited to join a worldwide renowned company like Siemens, and I would love to expose my motivation and skills to you during an eventual interview.

My main goal is to join a company, where I could both grow on my career path, and deliver the best quality work.

You shall find my resume attached to my application. If you require any further information, feel free to contact me.
Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

[Name Surname]
